

# National Ear Reconstruction Service

## Your Appointment

---

Your appointment is with a multi-disciplinary team. This means that there are a group of clinicians in the room with different skills and expertise. This has some advantages and disadvantages:

Advantages 😊	Disadvantages ☹️
<ul style="list-style-type: none"> <li>★ You don't have to tell your story over and over</li> <li>★ The clinicians can discuss your needs together</li> </ul>	<ul style="list-style-type: none"> <li>★ There can be lots of people in the room (it can feel a bit embarrassing or overwhelming)</li> </ul>

If this is your first appointment it is helpful (but not essential) that you meet everyone. If you have met us before then you will have a good idea about who you want to see today.

Please read through the list below and tick the box next to the people you want to have in the room for your appointment.

I am happy to meet with everyone today

☐

OR

I am happy to meet with the:

Plastic Surgeon

☐

Specialist Nurse

☐
