

**Children and Young People's
Speech and Language Therapy**

**Service for Deafness and Hearing Loss in
Infants and Young Children**

Information for parents and carers

Find us on FaceBook:

@NHSLothianSLT

and our website:

www.lets-talk.scot.nhs.uk

What we do:

Provide specialist advice and strategies

Early feeding advice for new parents

Parent-child interaction support and modelling

Training teachers and other professionals

Advice around signing

Assessing your child's speech, language and communication

We are a small team of specialist Speech and Language Therapists who work with deaf children across all of Lothian.

We work closely with a wide team of professionals including:

- Audiologists
- Cochlear Implant Team
- Paediatricians
- Teachers of the Deaf.

We can work directly with the child/young person but more often we work with their communication partners to provide advice and support strategies to improve their home/education environment.

Our aim is to help the child/young person to develop their communication skills to their full potential.

As the child progresses, the input may vary and an SLT may not always be involved with your child but we are always available for consultation.

Your child's input may look like:

Phone calls for updates on your child's progress

Near Me telepractice sessions with parents

Monitoring your child's speech, language and communication development

Providing resources for you to work on with your child

Face-to-face home/nursery/school visits

For more information about deafness and hearing loss, visit:
