

# Getting started with Signalong

## Information for parents and carers

Signalong is a key word signing system which supports spoken language. It is based on British Sign Language but differs in many ways. It supports individuals with communication difficulties.

To get started with Signalong, please watch our informative video which you can access through the link or QR code below:

<https://vimeo.com/869452845>

NHS Lothian Speech and Language Therapy team have also created lots of useful videos with a range of vocabulary. You may want to first look at this video with everyday signs before trying some of our topic vocabulary or songs. The link and QR code below will give you everyday signs to get started with.
