

Ultrasound uses echoes of sound waves to picture inside your body.

You need to lie still.

You will have jelly on your belly. The jelly helps the sound waves get through.

You can watch a DVD when you are lying on the bed!

## FACTS ABOUT ULTRASOUND

- You can not hear ultrasound - the sound waves' frequency is far above the human hearing range.

- Bats, dolphins and whales use ultrasound echolocation to navigate and hunt.

- Scotsman, Ian Donald pioneered the use of ultrasound in medicine in the 1950's after seeing it being used to find cracks in ships' metalwork.

## Come for your Ultrasound Scan

**Full Bladder**

At The Imaging Department

Scans and X-rays

# Ultrasound (full bladder)

## Information for parents and carers -

### What is an Ultrasound Scan?

An ultrasound scan uses sound waves to show inside the body. This type of test does not use x-rays.

### What will the test involve?

When your child arrives they will be taken to the ultrasound room where they will be met by a department assistant and a doctor. The ultrasound scan will be explained and there will be plenty of time to ask questions. You are able to stay with your child whilst this test is being carried out.

Your child will be asked to lie on the ultrasound couch. Some warm jelly will be put on the area that is being scanned. This is used to give the doctor a better picture and can be a little sticky but will be wiped off at the end. The doctor will use a small hand probe and move it gently over the area looking at the pictures on a screen.

### Will the test hurt?

This scan should not hurt but if the area being scanned is tender then there may be a little discomfort for your child but the doctor will be as gentle as they can.

### How long will it take?

This test will take 10-15 minutes.

### How will I get the results of the test?

The result will be sent to the doctor who asked for this test, normally within 7-10 days. The doctor who has asked for the test will then send you a follow-up appointment to discuss your results with them. If this was your GP, please contact them directly after 7-10 days.

The staff in the Imaging Department are unable to give results over the phone.

## What Preparation is required?

### Important information – please read

#### **Your Child must have full bladder for this scan.**

In order to get the pictures needed your child will need to have a full bladder for this scan.

#### **Your child should drink as much as possible at least 30 minutes before their appointment time in order for their bladder to be full.**

This only applies if your child is fully toilet trained.

It would be useful if your child could be dressed in loose clothing that can be moved easily from the area that is to be scanned.

### What if my child is taking medication?

Do not stop taking any prescribed medications, as it will not effect your scan. Nor will the scan effect the usefulness of the drug. If you have any questions about this do not hesitate to contact the department.

### What if I do not speak English?

If you need help with the English language please phone **0131 312 0896** as soon as possible and we can arrange an interpreter for you.

### How do I get to the Ultrasound Department?

Ultrasound is in the Imaging Department on the ground floor. Book in for your appointment at the Imaging Department reception.
