

# Pregnancy Easy read guide

# About this guide

There are no photos of real people's private body parts in this guide.

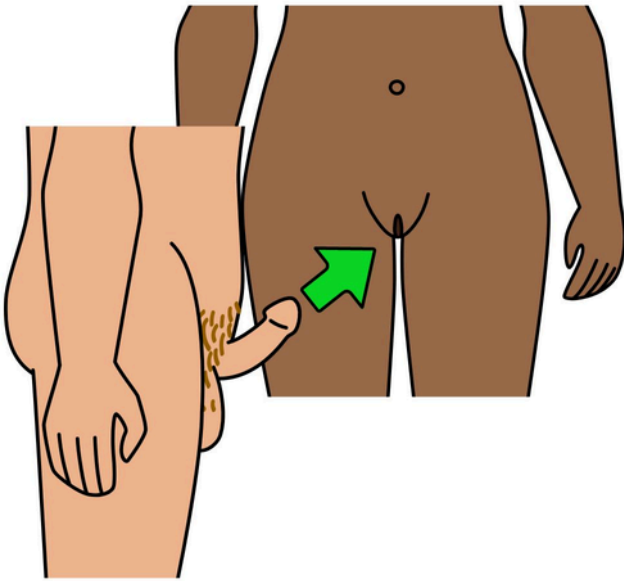

It is ok to see these drawings because you are learning about pregnancy.

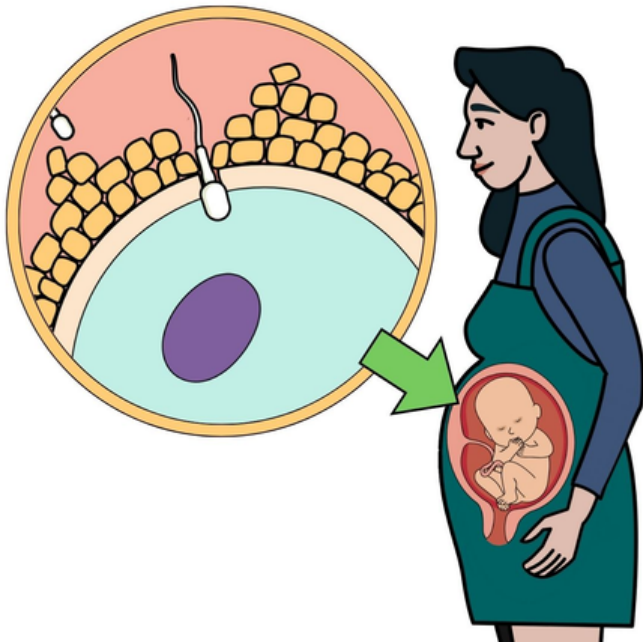

If you have any questions or are upset about anything you read, it is good to speak to an adult you trust.

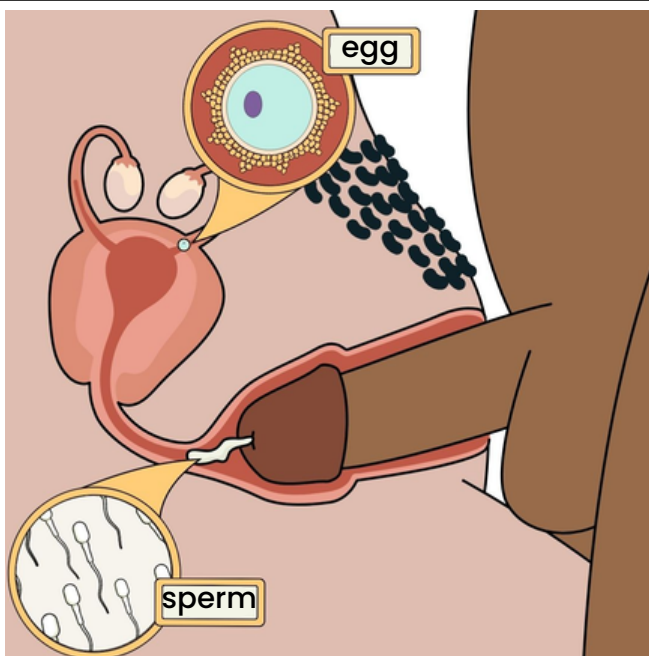

# How do people get pregnant?

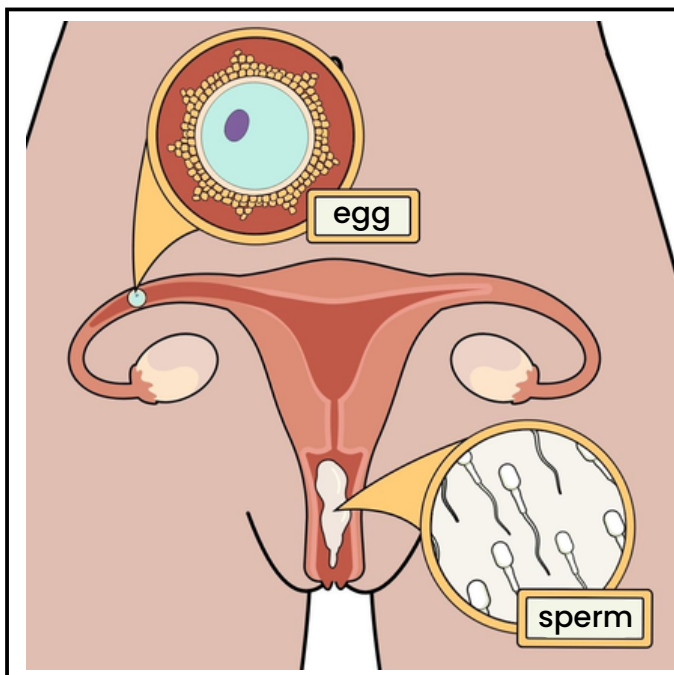

One way pregnancy happens is by having penis in vagina sex.

Pregnancy can happen when an egg and sperm meet and join together.

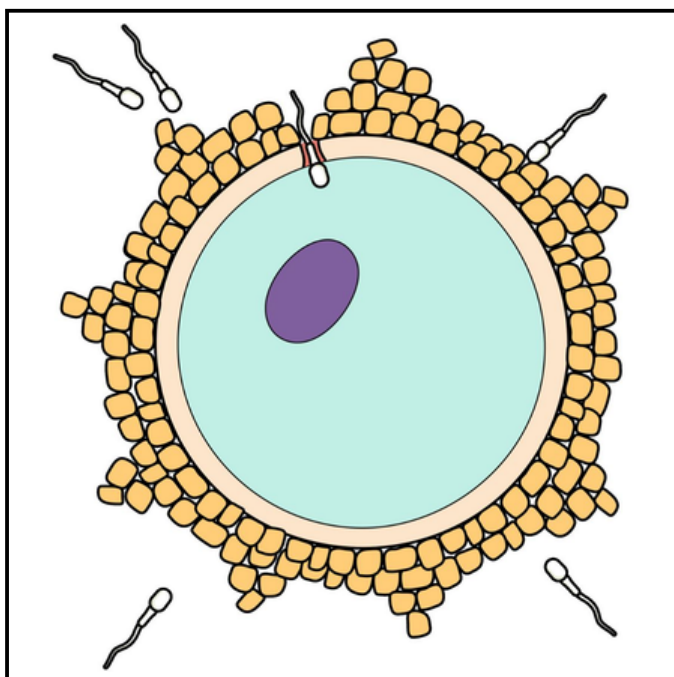

The egg and sperm meet during sex, when sperm comes out of the penis and into the vagina.

When sperm get into the vagina they swim towards the uterus.

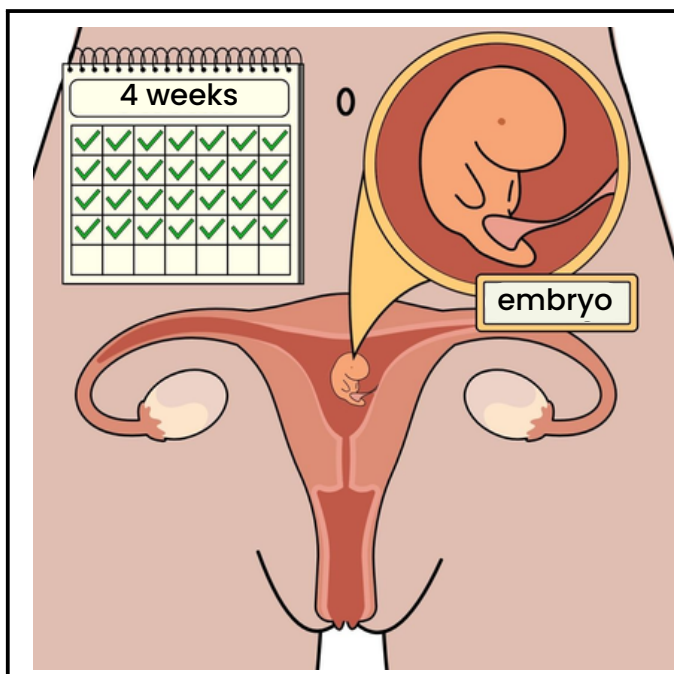

At the same time an egg might be moving through the uterus.

The egg and sperm might meet and join together. This is called conception.

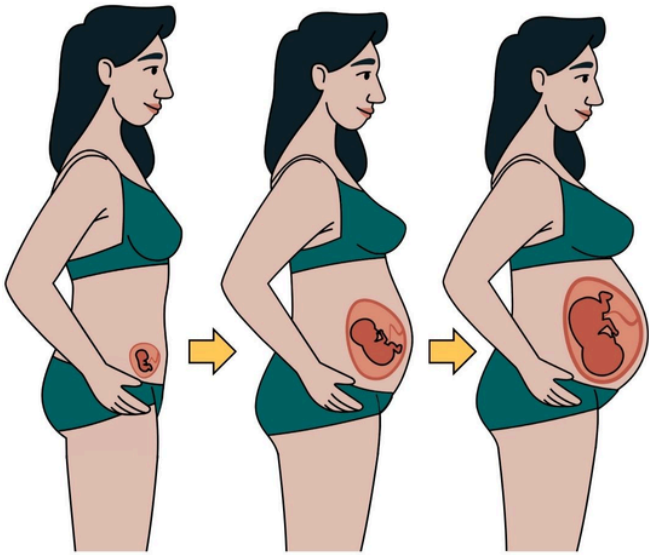

This can happen inside the uterus or fallopian tubes.

This is the beginning of a pregnancy.

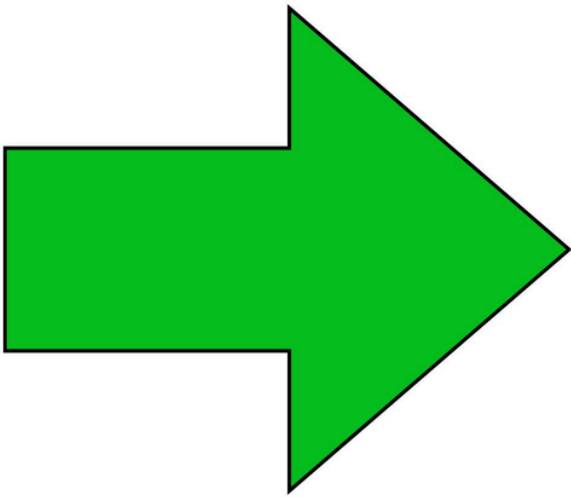

The joined up egg and sperm start to change and grow.

They are now called an embryo.

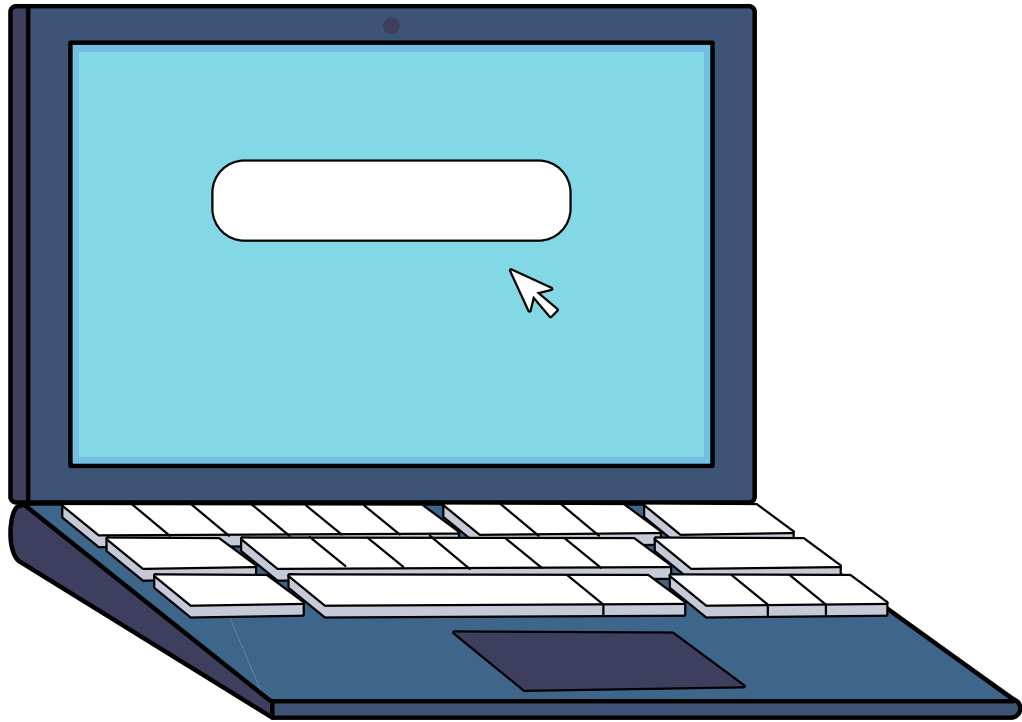

The embryo grows into a baby.

This takes 9 months and is called being pregnant.
